## HAWAII LONGLINE OBSERVER PROGRAM QUARTERLY STATUS REPORT October 1, 2004 – December 31, 2004

Pacific Islands Regional Office National Marine Fisheries Service January 25, 2005

The Hawaii-based pelagic longline fishery targeting tunas has been monitored under a mandatory observer program since February 1994. Beginning March 1994, branch personnel have conducted daily shoreside dock rounds in Honolulu to determine which fishing vessels are in port. These dock rounds are used to obtain an estimate of fishing effort on a real-time basis by assuming that a vessel is fishing when it is absent from the harbor. This report is used to ensure prompt dissemination of Hawaii Longline Observer Data and may be revised after final data editing has been completed. The following table summarizes percent observer coverage for vessel departures, vessels arriving with observers, and protected species interactions for vessels arriving with observers during the fourth quarter of 2004.

Departures	374
Departures with observers	
Observer coverage 4th quarter	
Vessels Arriving with Observers - 4th Quarter	
Departures with observers in 4th quarter	98
Observers departing in 3rd quarter arriving 4th quarter	19
Observers departing in 4th quarter arriving 1st quarter 2005	13
Total vessels arriving with observers - 4th quarter	104
Protected Species Interactions - 4th Quarter	
Vessels arriving with observers - 4th quarter	104
Trips with turtle interactions	
Trips without turtle interactions	100
Trips with marine mammal interactions	
Trips without marine mammal interactions	104
Trips with seabird interactions	
Trips without seabird interactions	104
Total Sea Turtle Interactions	4
Released Injured	
Leatherback	1
Released Dead	
Olive Ridley	3
Total Marine Mammal Interactions	0
Total Cookind Internations	
Total Seabird Interactions	O
Total Sets	1,272
Total Hooks Set	2,508,278
Turtles per 1,000 Hooks	0.002
Seabirds per 1,000 Hooks	0.000
Marine Mammals per 1,000 Hooks	0.000
marine maninais per 1,000 floors	0.000
Note: The percent of observer coverage is based on vessel depart	ures
Protected species interactions are based on vessel arrivals
